Tender Reference No: 830/06/2014 Lot 2

8 August 2014

Dear Mr Mallett

**LOT 2 (REPD) Maintain and publish a planning database for renewable energy installations - Notification pursuant to Regulation 32 of the Public Contracts Regulations 2006 (as amended)**

Thank you for your tender submitted in July 2014. We have now completed our evaluation of all the tenders received for this contract and, on behalf of the Department of Energy and Climate Change ("DECC"), I am writing to inform you that on this occasion your tender has been unsuccessful.

As indicated in the Invitation to Tender the tenders were scored against the following criteria:

<b>Criteria</b>	<b>Description / Sub-criteria</b>	<b>Weighting</b>
01	Lowest Price	<b>5%</b>
02	Project management experience / ability to demonstrate ability in a similar field	<b>15%</b>
03	Experience / ability to demonstrate successful data collection	<b>16%</b>
04	Experience / ability to demonstrate ability of successful database management and development	<b>16%</b>
05	Ensuring consistency with data currently produced	<b>16%</b>
06	Understanding of renewable energy and policy issues	<b>16%</b>
07	Understanding of DECC's requirements	<b>16%</b>

Our evaluation resulted in your bid receiving a score of 36.6, compared with shortlisted candidates, who scored in the range of 70.7 and 76.8.

The Sift Panel commented that the bid demonstrated experience of project management, with good evidence of data collection and development. However there was little evidence of how that would be applied to this work area. The bid also failed to demonstrate a good understanding of renewable energy and policy issues and of DECC's requirement.

I am sorry that this letter will cause you disappointment. This decision makes no difference to future work you might be interested in applying for and I hope that you will not be discouraged from submitting tenders in response to future opportunities.

Yours sincerely,

Jayne Redrup
